JOURNAL OF SPACECRAFT AND ROCKETS
Vol. 34, No. 6, November–December 1997

1997 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 853–857, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 857 and 858, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 859–863, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1997, that paper also will appear in the Chronological Index. Authors of Comments also are listed in the Author Index. The Book Review Index, page 864, lists the books reviewed during 1997, the author, publisher, and reviewer, and the volume, issue number, and page on which the review appeared.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Rarefied-Flow Transition Regime Orbiter Aerodynamic Acceleration Flight Measurements **A97-001**
Three-Dimensional Aerodynamic Shape Optimization Using Genetic and Gradient Search Algorithms **A97-005**
Large-Scale Roughness Influence on Turbulent Hypersonic Boundary Layers Approaching Compression Corners **A97-010**
Computational Fluid Dynamics Simulation of Turbulent Waverider Flowfield with Sideslip **A97-011**
Numerical Analysis of a Swept-Fin Missile **A97-021**
Effects of Severed Tethers in Space **A97-034**
Unsteady Flowfield and Cavity Acoustics of the Stratospheric Observatory for Infrared Astronomy **A97-057**
Aerodynamic Characteristics Evaluation of Hypersonic Flight Experiment Vehicle Based on Flight Data **A97-072**
Navier–Stokes Computations of Finned Kinetic Energy Projectile Base Flow **A97-073**
Calculation of Pitch Damping for a Flared Projectile **A97-086**
Computational Analysis and Validation for Lateral Jet Controlled Missiles **A97-091**
Analysis of Flowfields over Four-Engine DC-X Rockets **A97-096**
Base Cavity Effects on the Aerodynamic Characteristics of a Hypersonic Flared Projectile **A97-115**

Aerospace Plane

Mission Performance and Design Sensitivities of Air-Breathing Hypersonic Launch Vehicles **A97-022**
Periodic Optimal Cruise for a Hypersonic Vehicle with Constraints **A97-023**
Aerodynamic Characteristics Evaluation of Hypersonic Flight Experiment Vehicle Based on Flight Data **A97-072**

Cabin Environment, Crew Training, and Life Support

Air-Quality Monitoring and Detection of Air Contamination in an Enclosed Environment **A97-079**

Configuration Design

Three-Dimensional Aerodynamic Shape Optimization Using Genetic and Gradient Search Algorithms **A97-005**

Flight Mechanics

Effects of Severed Tethers in Space **A97-034**
Improved Matched Asymptotic Solutions for Three-Dimensional Atmospheric Skip Trajectories **A97-076**
Calculation of Pitch Damping for a Flared Projectile **A97-086**

Flight Operations

Effects of Severed Tethers in Space **A97-034**

Performance

Mission Performance and Design Sensitivities of Air-Breathing Hypersonic Launch Vehicles **A97-022**

Simulation

Extreme Value Flight Duration Analysis of Four-Engine Spacecraft **A97-063**

STOL/VTOL/STOVL

Simulation of an Aerospace Vehicle Pitch-Over Maneuver **A97-037**

Energy

Conservation

Thermal Sensitivity Analysis of Spacecraft Battery **A97-059**

Photovoltaic Power

Model of Plasma Contactor Performance **A97-128**

Fluid Dynamics

Aeroacoustics

Unsteady Flowfield and Cavity Acoustics of the Stratospheric Observatory for Infrared Astronomy **A97-057**

Boundary Layers and Heat Transfer—Laminar

Comparison Between Numerical and Experimental Results on Different Hermes Elevon Shapes **A97-042**
Three-Dimensional Hypersonic Laminar Boundary-Layer Computations for Transition Experiment Design **A97-065**

Boundary Layers and Heat Transfer—Turbulent

Large-Scale Roughness Influence on Turbulent Hypersonic Boundary Layers Approaching Compression Corners **A97-010**
Comparison Between Numerical and Experimental Results on Different Hermes Elevon Shapes **A97-042**

Boundary-Layer Stability and Transition

Three-Dimensional Hypersonic Laminar Boundary-Layer Computations for Transition Experiment Design **A97-065**
Effect of Isolated Roughness Elements on Boundary-Layer Transition for Shuttle Orbiter **A97-067**
Development of a Flight Article for a Hypersonic Boundary-Layer Experiment **A97-094**
Enthalpy Effects on Hypervelocity Boundary-Layer Transition: Ground Test and Flight Data **A97-095**

Computational Fluid Dynamics

Rarefied-Flow Transition Regime Orbiter Aerodynamic Acceleration Flight Measurements **A97-001**
Computational Fluid Dynamics Simulation of Turbulent Waverider Flowfield with Sideslip **A97-011**
Damped Oscillations of a Liquid/Gas Surface upon Step Reduction in Gravity **A97-015**

Numerical Analysis of a Swept-Fin Missile A97-021
Structure of a Supersonic Three-Dimensional Cylinder/Offset-Flare Turbulent Interaction A97-046
Three-Dimensional Hypersonic Laminar Boundary-Layer Computations for Transition Experiment Design A97-065
Fluid Dynamics of Hypersonic Forward-Facing Cavity Flow A97-068
Experimental Study of Cone-Derived Waveriders at Mach 5.5 A97-069
High-Enthalpy Aerothermodynamics of a Mars Entry Vehicle Part 1: Experimental Results A97-070
High-Enthalpy Aerothermodynamics of a Mars Entry Vehicle Part 2: Computational Results A97-071
Navier–Stokes Computations of Finned Kinetic Energy Projectile Base Flow A97-073
Transonic Flow Simulation for a Bulbous Heat Shield A97-084
Calculation of Pitch Damping for a Flared Projectile A97-086
High-Fidelity Thermal Protection System Sizing of Reusable Launch Vehicle A97-090
Computational Analysis and Validation for Lateral Jet Controlled Missiles A97-091
Analysis of Flowfields over Four-Engine DC-X Rockets A97-096
Validation Database for Propulsion Computational Fluid Dynamics A97-099
Hypersonic Thermal Environment of a Proposed Single-Stage-to-Stage-Orbit Vehicle A97-109
Base Cavity Effects on the Aerodynamic Characteristics of a Hypersonic Flared Projectile A97-115
Navier–Stokes Predictions of Pitch Damping for Axisymmetric Projectiles A97-117

Hydrodynamics

Damped Oscillations of a Liquid/Gas Surface upon Step Reduction in Gravity A97-015

Hypersonic Flow

Three-Dimensional Aerodynamic Shape Optimization Using Genetic and Gradient Search Algorithms A97-005
Aerodynamic Forces and Moments for a Re-Entry Module A97-025
Comparison Between Numerical and Experimental Results on Different Hermes Elevon Shapes A97-042
Optimal Properties of Bodies of Revolution in Continuum and Free Molecular Regimes A97-062
Fin Leading-Edge Sweep Effect on Shock–Shock Interaction at Mach 6 A97-066
Effect of Isolated Roughness Elements on Boundary-Layer Transition for Shuttle Orbiter A97-067
Experimental Study of Cone-Derived Waveriders at Mach 5.5 A97-069
Aerodynamic Characteristics Evaluation of Hypersonic Flight Experiment Vehicle Based on Flight Data A97-072
Method of Basic Projectiles for Calculating Force Coefficients A97-083
Plasma and Aerothermal Measurements on a Hypervelocity Re-Entry Vehicle A97-093
Enthalpy Effects on Hypervelocity Boundary-Layer Transition: Ground Test and Flight Data A97-095
Hypersonic Thermal Environment of a Proposed Single-Stage-to-Stage-Orbit Vehicle A97-109
Experimental Rarefied Density Flowfields at Hypersonic Conditions over 70-Degree Blunted Cone A97-111
Experimental Rarefied Aerodynamic Forces at Hypersonic Conditions over 70-Degree Blunted Cone A97-112
Experimental Rarefied Heat Transfer at Hypersonic Conditions over 70-Degree Blunted Cone A97-113
Control Effectiveness of a Jet–Slender Body Combination at Hypersonic Speeds A97-118

Inlet, Nozzle, Diffuser, and Channel Flows

Fluid Dynamics of Hypersonic Forward-Facing Cavity Flow A97-068
Flow Confluence Past a Jet-On Axisymmetric Afterbody A97-092

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Numerical Investigation of Supersonic Base Flow with Base Bleed A97-009
Computational Fluid Dynamics Simulation of Turbulent Waverider Flowfield with Sideslip A97-011
Turbulent Flow Structure Characterization of Angled Injection into a Supersonic Crossflow A97-029
Effect of Riblets on Axisymmetric Base Pressure A97-038
Fin Leading-Edge Sweep Effect on Shock–Shock Interaction at Mach 6 A97-066
Navier–Stokes Computations of Finned Kinetic Energy Projectile Base Flow A97-073

Plasmadynamics and MHD

Plasma and Aerothermal Measurements on a Hypervelocity Re-Entry Vehicle A97-093

Rarefied Flows

Rarefied-Flow Transition Regime Orbiter Aerodynamic Acceleration Flight Measurements A97-001
Monte Carlo Modeling and Analysis of Pressure Sensor Measurements During Suborbital Flight A97-012
Aerodynamic Forces and Moments for a Re-Entry Module A97-025
Nocilla Model Parameters Obtained from Forces Exerted on Surfaces by Molecular Beams A97-058
Optimal Properties of Bodies of Revolution in Continuum and Free Molecular Regimes A97-062
Method of Basic Projectiles for Calculating Force Coefficients A97-083
Aerodynamic Flight Measurements and Rarefied-Flow Simulations of Mars Entry Vehicles A97-108
Experimental Rarefied Density Flowfields at Hypersonic Conditions over 70-Degree Blunted Cone A97-111
Experimental Rarefied Aerodynamic Forces at Hypersonic Conditions over 70-Degree Blunted Cone A97-112
Experimental Rarefied Heat Transfer at Hypersonic Conditions over 70-Degree Blunted Cone A97-113

Separated Flows

Numerical Investigation of Supersonic Base Flow with Base Bleed A97-009
Hammerhead Wake Effects on Elastic Vehicle Dynamics A97-020
Effect of Riblets on Axisymmetric Base Pressure A97-038
Wind-Tunnel Test of Flow Through Mars Pathfinder Lander A97-041
Zero-Lift Drag Characteristics of Afterbodies with a Square Base A97-045
Structure of a Supersonic Three-Dimensional Cylinder/Offset-Flare Turbulent Interaction A97-046

Shock Waves and Detonations

Fin Leading-Edge Sweep Effect on Shock–Shock Interaction at Mach 6 A97-066
Experimental Study of Cone-Derived Waveriders at Mach 5.5 A97-069

Supersonic Flow

Numerical Investigation of Supersonic Base Flow with Base Bleed A97-009
Turbulent Flow Structure Characterization of Angled Injection into a Supersonic Crossflow A97-029
Structure of a Supersonic Three-Dimensional Cylinder/Offset-Flare Turbulent Interaction A97-046
Optimization of a Dual-Mixture-Ratio Hydrogen-Fuel Rocket A97-089
Flow Confluence Past a Jet-On Axisymmetric Afterbody A97-092

Transonic Flow

Zero-Lift Drag Characteristics of Afterbodies with a Square Base A97-045
Transonic Flow Simulation for a Bulbous Heat Shield A97-084

Unsteady Flows

Hammerhead Wake Effects on Elastic Vehicle Dynamics A97-020
Simulation of an Aerospace Vehicle Pitch-Over Maneuver A97-037
Unsteady Flowfield and Cavity Acoustics of the Stratospheric Observatory for Infrared Astronomy A97-057
Fluid Dynamics of Hypersonic Forward-Facing Cavity Flow A97-068

Vortices

Zero-Lift Drag Characteristics of Afterbodies with a Square Base A97-045

Wave Motion and Sloshing

Damped Oscillations of a Liquid/Gas Surface upon Step Reduction in Gravity A97-015

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

Method of Basic Projectiles for Calculating Force Coefficients A97-083

Astrodynamics

Exact Design of Partial Coverage Satellite Constellations over Oblate Earth A97-004
Trajectory Options to Pluto via Gravity Assists from Venus, Mars, and Jupiter A97-053
Improved Matched Asymptotic Solutions for Three-Dimensional Atmospheric Skip Trajectories A97-076
Navigating Galileo at Jupiter Arrival A97-077

Dynamics

Individual Components of the Yaw Damping Sum: Implementation for Tumbling Bodies A97-087
Damped Gyroscopic Modes of Spinning Tethered Space Vehicles with Flexible Booms A97-102

Engine Control

Mixture-Ratio Control to Improve Hydrogen-Fuel Rocket Performance A97-030
Optimization of a Dual-Mixture-Ratio Hydrogen-Fuel Rocket A97-089

Flight Mechanics

Aerodynamic Considerations for Kinetic Energy Projectiles A97-040
Six-Degree-of-Freedom Entry Dispersion Analysis for the METEOR Recovery Module A97-051
Flight Control Augmentors for Aft-Center-of-Gravity Launch Vehicles A97-075
Navier–Stokes Predictions of Pitch Damping for Axisymmetric Projectiles A97-117
Extracting Meteorological Data from Projectile Trajectory A97-119

Launch Vehicle Guidance and Control

Six-Degree-of-Freedom Trajectory Targeting and Optimization for Titan Launch Vehicles A97-052

Missile Dynamics

Aerodynamic Considerations for Kinetic Energy Projectiles A97-040

Navigation

Navigating Galileo at Jupiter Arrival A97-077
Efficient Approach for International Space Station Global Positioning System Multipath Analysis A97-132

Optimization Techniques

Periodic Optimal Cruise for a Hypersonic Vehicle with Constraints A97-023
Collaborative Approach to Launch Vehicle Design A97-074

Pointing Systems

Performance of Diamond-Coated Silicon Nitride Bearings A97-106

Spacecraft Dynamics

Planning Spiral Motions of Nonholonomic Free-Flying Space Robots A97-019
Experimental Investigation of Spacecraft In-Flight Disturbances and Dynamic Response A97-028
Preflight Testing and Flight Performance of the OEDIPUS-C Tether Force Sensor A97-080
Efficient Calculation of a Jitter/Stability Metric A97-082
Computational Comparison of Debris Cloud Models A97-100
Damped Gyroscopic Modes of Spinning Tethered Space Vehicles with Flexible Booms A97-102

Spacecraft Guidance and Control

Planning Spiral Motions of Nonholonomic Free-Flying Space Robots A97-019
Efficient Calculation of a Jitter/Stability Metric A97-082
Computational Comparison of Debris Cloud Models A97-100

State Estimation

Air-Quality Monitoring and Detection of Air Contamination in an Enclosed Environment A97-079

Structural Control

Symmetric Motion Control for Adaptive Structure Based Construction of Large Space Structures A97-016

System Identification

Air-Quality Monitoring and Detection of Air Contamination in an Enclosed Environment A97-079

Trajectory Optimization

Periodic Optimal Cruise for a Hypersonic Vehicle with Constraints A97-023
Aerodynamic Considerations for Kinetic Energy Projectiles A97-040
Six-Degree-of-Freedom Entry Dispersion Analysis for the METEOR Recovery Module A97-051
Six-Degree-of-Freedom Trajectory Targeting and Optimization for Titan Launch Vehicles A97-052
Heliospheric Boundary Exploration Using Ion Propulsion Spacecraft A97-056
Maximum-Payload Transfers to Geosynchronous Orbit Using Arcjet Thrusters A97-064
Extracting Meteorological Data from Projectile Trajectory A97-119

Interdisciplinary Topics

Aerospace Technology Utilization

Development and Operation of a Microgravity Furnace System for Sintering Experiments A97-014

Analytical and Numerical Methods

Collaborative Approach to Launch Vehicle Design A97-074
Efficient Calculation of a Jitter/Stability Metric A97-082
Individual Components of the Yaw Damping Sum: Implementation for Tumbling Bodies A97-087

Atmospheric and Space Sciences

Experimental Investigation of Spacecraft In-Flight Disturbances and Dynamic Response A97-028
Contamination Experiments in the Midcourse Space Experiment A97-031
Aerodynamic Flight Measurements and Rarefied-Flow Simulations of Mars Entry Vehicles A97-108
Modeling the Multiphase Atmospheric Chemistry of Launch Clouds A97-121

Reliability, Maintainability, and Logistics Support

Extreme Value Flight Duration Analysis of Four-Engine Spacecraft A97-063
Some Correlation Techniques for Environmentally Induced Anomalies Analysis A97-103

Research Facilities and Instrumentation

Steady-State and Frequency Response of a Thin-Film Heat Flux Gauge A97-123

Sensor Systems

Steady-State and Frequency Response of a Thin-Film Heat Flux Gauge A97-123

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Aerodynamics for a Winged, Circular-Body, Single-Stage-to-Orbit Spacecraft Configuration A97-006
New Semiempirical Model for Wing–Tail Interference A97-007
Nonlinear Aeroprediction Methodology for Roll Position of 45 Degrees A97-008
Large-Scale Roughness Influence on Turbulent Hypersonic Boundary Layers Approaching Compression Corners A97-010
Numerical Analysis of a Swept-Fin Missile A97-021
Optimal Properties of Bodies of Revolution in Continuum and Free Molecular Regimes A97-062
Transonic Flow Simulation for a Bulbous Heat Shield A97-084
Methods for Distributing Semiempirical, Nonlinear, Aerodynamic Loads on Missile Components A97-116
Navier–Stokes Predictions of Pitch Damping for Axisymmetric Projectiles A97-117
Control Effectiveness of a Jet–Slender Body Combination at Hypersonic Speeds A97-118

Configuration Design

Nonlinear Aeroprediction Methodology for Roll Position of 45 Degrees A97-008
Mission Performance and Design Sensitivities of Air-Breathing Hypersonic Launch Vehicles A97-022
Payload Capability of Kerosene-Fueled Mini Shuttle A97-107
Methods for Distributing Semiempirical, Nonlinear, Aerodynamic Loads on Missile Components A97-116

Launch Vehicle and Sounding Rocket Systems

Hammerhead Wake Effects on Elastic Vehicle Dynamics A97-020
Six-Degree-of-Freedom Trajectory Targeting and Optimization for Titan Launch Vehicles A97-052
Collaborative Approach to Launch Vehicle Design A97-074
Flight Control Augmentors for Aft-Center-of-Gravity Launch Vehicles A97-075
Analysis of Flowfields over Four-Engine DC-X Rockets A97-096
Tripropellant Engine Option Comparison for Single Stage to Orbit A97-098
Payload Capability of Kerosene-Fueled Mini Shuttle A97-107

Missile Systems

New Semiempirical Model for Wing–Tail Interference A97-007
Nonlinear Aeroprediction Methodology for Roll Position of 45 Degrees A97-008
Preliminary Design of a Hybrid Propulsion Multimission Missile System A97-026
Computational Analysis and Validation for Lateral Jet Controlled Missiles A97-091
Methods for Distributing Semiempirical, Nonlinear, Aerodynamic Loads on Missile Components A97-116

Propulsion and Propellant Systems

Mixture-Ratio Control to Improve Hydrogen-Fuel Rocket Performance A97-030
Functional Performance of Pyrovalves A97-060

Tripropellant Engine Option Comparison for Single Stage to Orbit A97-098
Payload Capability of Kerosene-Fueled Mini Shuttle A97-107

Testing, Flight and Ground

Functional Performance of Pyrovalves A97-060

Thermal Protection Systems

Film Cooling Effect of Hydrogen on Cylinder in Supersonic Airflow A97-044

Propulsion

Electric and Advanced Space Propulsion

Life Extension Strategies for Shuttle-Deployed Small Satellites Using Pulsed Plasma Thrusters A97-122
Model of Plasma Contactor Performance A97-128

Engine Performance

Extreme Value Flight Duration Analysis of Four-Engine Spacecraft A97-063
Optimization of a Dual-Mixture-Ratio Hydrogen-Fuel Rocket A97-089
Tripropellant Engine Option Comparison for Single Stage to Orbit A97-098

Environmental Effects

Solid Rocket Motor Exhaust Model for Alumina Particles in the Stratosphere A97-047
Predicted Optical Characteristics of Solid Rocket Motor Exhaust in the Stratosphere A97-048
Effects of Launch Vehicle Emissions in the Stratosphere A97-120

Hybrid Rocket Engines

Preliminary Design of a Hybrid Propulsion Multimission Missile System A97-026

Injector Design and Characterization

Validation Database for Propulsion Computational Fluid Dynamics A97-099

Liquid Rocket Motors and Missile Systems

Mixture-Ratio Control to Improve Hydrogen-Fuel Rocket Performance A97-030

Solid Rocket Motors and Missile Systems

Solid Rocket Motor Exhaust Model for Alumina Particles in the Stratosphere A97-047
Predicted Optical Characteristics of Solid Rocket Motor Exhaust in the Stratosphere A97-048
Validation Database for Propulsion Computational Fluid Dynamics A97-099

Space Technology

Aerobraking Configurations/ Aerothermodynamics

Aerodynamic Forces and Moments for a Re-Entry Module A97-025
High-Enthalpy Aerothermodynamics of a Mars Entry Vehicle Part 1: Experimental Results A97-070
High-Enthalpy Aerothermodynamics of a Mars Entry Vehicle Part 2: Computational Results A97-071
Aerodynamic Flight Measurements and Rarefied-Flow Simulations of Mars Entry Vehicles A97-108
Experimental Rarefied Density Flowfields at Hypersonic Conditions over 70-Degree Blunted Cone A97-111
Experimental Rarefied Aerodynamic Forces at Hypersonic Conditions over 70-Degree Blunted Cone A97-112
Experimental Rarefied Heat Transfer at Hypersonic Conditions over 70-Degree Blunted Cone A97-113

Aerobraking Flight Mechanics

Mars-Jupiter Aerogravity Assist Trajectories for High-Energy Missions A97-002
Improved Matched Asymptotic Solutions for Three-Dimensional Atmospheric Skip Trajectories A97-076

Humans in Space/Life Support Systems, EVA

Astronaut-Induced Disturbances in Microgravity A97-036
Internal Effects Model for Spacecraft Modules Perforated by Orbital Debris A97-050
International Space Station Electromagnetic Environment A97-131

Landers

Aerodynamics for a Winged, Circular-Body, Single-Stage-to-Orbit Spacecraft Configuration A97-006
Wind-Tunnel Test of Flow Through Mars Pathfinder Lander A97-041
Lunar Landing Craft for the Reusable Launch Vehicle and Shuttle Vehicles A97-085

Mission Design and Analysis

Exact Design of Partial Coverage Satellite Constellations over Oblate Earth A97-004
Trajectory Options to Pluto via Gravity Assists from Venus, Mars, and Jupiter A97-053
Heliospheric Boundary Exploration Using Ion Propulsion Spacecraft A97-056
Maximum-Payload Transfers to Geosynchronous Orbit Using Arcjet Thrusters A97-064
Cassini/Huygens Science Instruments, Spacecraft, and Mission A97-078
Lunar Landing Craft for the Reusable Launch Vehicle and Shuttle Vehicles A97-085
Computational Comparison of Debris Cloud Models A97-100
Systems Engineering Trades for the IRIDIUM® Constellation A97-104
Life Extension Strategies for Shuttle-Deployed Small Satellites Using Pulsed Plasma Thrusters A97-122
Neutral Orbital Altitude Density Effects on the International Space Station A97-127
Cost per Billable Minute Metric for Comparing Satellite Systems A97-130

Mission Trajectories (Earth and Interplanetary)

Mars-Jupiter Aerogravity Assist Trajectories for High-Energy Missions A97-002
Advanced Propulsion for Geostationary Orbit Insertion and North–South Station Keeping A97-003
Trajectory Options to Pluto via Gravity Assists from Venus, Mars, and Jupiter A97-053
Heliospheric Boundary Exploration Using Ion Propulsion Spacecraft A97-056
Maximum-Payload Transfers to Geosynchronous Orbit Using Arcjet Thrusters A97-064
Navigating Galileo at Jupiter Arrival A97-077

Space Experiments

Radiation-Induced Anomalies in Satellites A96-142
Monte Carlo Modeling and Analysis of Pressure Sensor Measurements During Suborbital Flight A97-012
Flight Data Analysis for the Photovoltaic Array Space Power Plus Diagnostics Experiment A97-013
Development and Operation of a Microgravity Furnace System for Sintering Experiments A97-014
Low-Earth-Orbit Micrometeoroid and Debris Investigations A97-017
Astronaut-Induced Disturbances in Microgravity A97-036
Cassini/Huygens Science Instruments, Spacecraft, and Mission A97-078
Transient Potential Modification of Large Spacecraft Due to Electron Emissions A97-101
Neutral Orbital Altitude Density Effects on the International Space Station A97-127

Space Processing

Development and Operation of a Microgravity Furnace System for Sintering Experiments A97-014
Some Correlation Techniques for Environmentally Induced Anomalies Analysis A97-103

Space Systems

Radiation-Induced Anomalies in Satellites A96-142
Flight Data Analysis for the Photovoltaic Array Space Power Plus Diagnostics Experiment A97-013
Low-Earth-Orbit Micrometeoroid and Debris Investigations A97-017
Cassini/Huygens Science Instruments, Spacecraft, and Mission A97-078
Evolution of Secondary Electron Emission Characteristics of Spacecraft Surfaces A97-088
Transient Potential Modification of Large Spacecraft Due to Electron Emissions A97-101
Systems Engineering Trades for the IRIDIUM® Constellation A97-104
Cost per Billable Minute Metric for Comparing Satellite Systems A97-130

Spacecraft Attitude Determination

Moon–Sun Attitude Sensor A97-055
Performance of Diamond-Coated Silicon Nitride Bearings A97-106
Position of Propellant in Teardrop Tank Systems A97-124
Neutral Orbital Altitude Density Effects on the International Space Station A97-127
Efficient Approach for International Space Station Global Positioning System Multipath Analysis A97-132

Spacecraft Communication

Systems Engineering Trades for the IRIDIUM® Constellation A97-104
International Space Station Electromagnetic Environment A97-131
Efficient Approach for International Space Station Global Positioning System Multipath Analysis A97-132

Spacecraft Contamination/Sterilization

Contamination Experiments in the Midcourse Space Experiment A97-031
Evolution of Secondary Electron Emission Characteristics of Spacecraft Surfaces A97-088

Spacecraft Data Sensing, Processing, and Transmission

Moon–Sun Attitude Sensor A97-055

Spacecraft Power

Flight Data Analysis for the Photovoltaic Array Space Power Plus Diagnostics Experiment A97-013
Model of Plasma Contactor Performance A97-128

Spacecraft Propulsion System Integration

Functional Performance of Pyrovalves A97-060
Lunar Landing Craft for the Reusable Launch Vehicle and Shuttle Vehicles A97-085
Life Extension Strategies for Shuttle-Deployed Small Satellites Using Pulsed Plasma Thrusters A97-122
Position of Propellant in Teardrop Tank Systems A97-124

Spacecraft Radiation Protection

Radiation-Induced Anomalies in Satellites A96-142
Some Correlation Techniques for Environmentally Induced Anomalies Analysis A97-103
International Space Station Electromagnetic Environment A97-131

Spacecraft Sensor Systems

Experimental Investigation of Spacecraft In-Flight Disturbances and Dynamic Response A97-028
Contamination Experiments in the Midcourse Space Experiment A97-031
Wind-Tunnel Test of Flow Through Mars Pathfinder Lander A97-041
Moon–Sun Attitude Sensor A97-055
Preflight Testing and Flight Performance of the OEDIPUS-C Tether Force Sensor A97-080

Spacecraft Structural Configuration, Design, and Analysis

Simulation of an Aerospace Vehicle Pitch-Over Maneuver A97-037
Cracking Characteristics of Dual-Wall Structures Following Simulated Orbital Debris Particle Impact A97-049
Internal Effects Model for Spacecraft Modules Perforated by Orbital Debris A97-050
Damped Gyroscopic Modes of Spinning Tethered Space Vehicles with Flexible Booms A97-102
Spacecraft Launch Depressurization Loads A97-125

Spacecraft Test and Evaluation

Dynamic Model for Global Positioning System Block IIR Space Vehicle A97-054
Deployment Test Methods for a Large Deployable Mesh Reflector A97-126

Spacecraft Thermal Management

High-Fidelity Thermal Protection System Sizing of Reusable Launch Vehicle A97-090

Structural Mechanics and Materials

Flexible and Active Structures

Symmetric Motion Control for Adaptive Structure Based Construction of Large Space Structures A97-016

Materials Structural Properties

U-Groove Aluminum Weld Strength Improvement A97-018
Cracking Characteristics of Dual-Wall Structures Following Simulated Orbital Debris Particle Impact A97-049

Structural Design

U-Groove Aluminum Weld Strength Improvement A97-018
Cracking Characteristics of Dual-Wall Structures Following Simulated Orbital Debris Particle Impact A97-049
Development of a Flight Article for a Hypersonic Boundary-Layer Experiment A97-094
Deployment Test Methods for a Large Deployable Mesh Reflector A97-126

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

Influence of X-Ray Solar Flare Radiation on Degradation of Teflon® in Space A97-081

Structural Dynamics and Characterization

Astronaut-Induced Disturbances in Microgravity A97-036
Dynamic Model for Global Positioning System Block IIR Space Vehicle A97-054

Structural Finite Elements

Dynamic Model for Global Positioning System Block IIR Space Vehicle A97-054
Development of a Flight Article for a Hypersonic Boundary-Layer Experiment A97-094

Structural Optimization

U-Groove Aluminum Weld Strength Improvement A97-018

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition and Degradation

Galileo Probe Heat Shield Ablation Experiment A97-110

Aerothermodynamics/Thermal Protection

Trajectory-Based Validation of the Shuttle Heating Environment A97-024
Film Cooling Effect of Hydrogen on Cylinder in Supersonic Airflow A97-044
Effect of Isolated Roughness Elements on Boundary-Layer Transition for Shuttle Orbiter A97-067
High-Enthalpy Aerothermodynamics of a Mars Entry Vehicle Part 1: Experimental Results A97-070
High-Enthalpy Aerothermodynamics of a Mars Entry Vehicle Part 2: Computational Results A97-071
High-Fidelity Thermal Protection System Sizing of Reusable Launch Vehicle A97-090
Enthalpy Effects on Hypervelocity Boundary-Layer Transition: Ground Test and Flight Data A97-095
Hypersonic Thermal Environment of a Proposed Single-Stage-to-Stage-Orbit Vehicle A97-109
Galileo Probe Heat Shield Ablation Experiment A97-110

Thermal Control

Thermal Sensitivity Analysis of Spacecraft Battery A97-059
Influence of X-Ray Solar Flare Radiation on Degradation of Teflon® in Space A97-081

Chronological Index

A97-001 Rarefied-Flow Transition Regime Orbiter Aerodynamic Acceleration Flight Measurements. Robert C. Blanchard and Richard G. Wilmoth, *NASA Langley Research Center*; and Gerald J. LeBeau, *NASA Johnson Space Center* (**34**, 1, p. 8) Article based on AIAA Paper 96-2467

A97-002 Mars-Jupiter Aerogravity Assist Trajectories for High-Energy Missions. Fayyaz A. Lohar, Arun K. Misra, and Dan Mateescu, *McGill University* (**34**, 1, p. 16) Article based on AIAA Paper 95-0457

A97-003 Advanced Propulsion for Geostationary Orbit Insertion and North–South Station Keeping. Steven R. Oleson and Roger M. Myers, *NYMA Inc.*; Craig A. Kluever, *University of Missouri–Columbia/Kansas City*; and John P. Riehl and Francis M. Curran, *NASA Lewis Research Center* (**34**, 1, p. 22) Article

A97-004 Exact Design of Partial Coverage Satellite Constellations over Oblate Earth. Der-Ming Ma and Wen-Chiang Hsu, *Tamkang University, Taiwan, ROC* (**34**, 1, p. 29) Article based on AIAA Paper 94-3721 CP9411

A97-005 Three-Dimensional Aerodynamic Shape Optimization Using Genetic and Gradient Search Algorithms. Norman F. Foster, *Lockheed Martin Corporation*; and George S. Dulikravich, *Pennsylvania State University* (**34**, 1, p. 36) Article

A97-006 Aerodynamics for a Winged, Circular-Body, Single-Stage-to-Orbit Spacecraft Configuration. W. Pelham Phillips and Walter C. Engelund, *NASA Langley Research Center* (**34**, 1, p. 43) Article based on AIAA Paper 95-1848 CP955

A97-007 New Semiempirical Model for Wing–Tail Interference. F. G. Moore and R. M. McInville, *U.S. Naval Surface Warfare Center* (**34**, 1, p. 48) Article based on AIAA Paper 96-3393 CP967

A97-008 Nonlinear Aeroprediction Methodology for Roll Position of 45 Degrees. F. G. Moore and R. M. McInville, *U.S. Naval Surface Warfare Center* (**34**, 1, p. 54) Article

A97-009 Numerical Investigation of Supersonic Base Flow with Base Bleed. Jubaraj Sahu and Karen R. Heavey, *U.S. Army Research Laboratory* (**34**, 1, p. 62) Article

A97-010 Large-Scale Roughness Influence on Turbulent Hypersonic Boundary Layers Approaching Compression Corners. H. Babinsky, *Cranfield University, England, UK*; and J. A. Edwards, *Defence Research Agency, England, UK* (**34**, 1, p. 70) Article based on AIAA Paper 95-0334

A97-011 Computational Fluid Dynamics Simulation of Turbulent Waverider Flowfield with Sideslip. Yijian Shi and John B. Miles, *University of Missouri–Columbia*; and Kakkattukuzhy Isaac, *University of Missouri–Rolla* (**34**, 1, p. 76) Article

A97-012 Monte Carlo Modeling and Analysis of Pressure Sensor Measurements During Suborbital Flight. N. A. Gatsonis and E. P. Maynard, *Worcester Polytechnic Institute*; and R. E. Erlandson, *Johns Hopkins University, Applied Physics Laboratory* (**34**, 1, p. 83) Article

A97-013 Flight Data Analysis for the Photovoltaic Array Space Power Plus Diagnostics Experiment. James D. Soldi and Daniel E. Hastings, *Massachusetts Institute of Technology*; and David Hardy, Donald Guidice, and Kevin Ray, *U.S. Air Force Phillips Laboratory* (**34**, 1, p. 92) Article

A97-014 Development and Operation of a Microgravity Furnace System for Sintering Experiments. John G. Vandegrift, Steven L. Noojin, and James E. Smith Jr., *University of Alabama in Huntsville* (**34**, 1, p. 104) Article

A97-015 Damped Oscillations of a Liquid/Gas Surface upon Step Reduction in Gravity. G. Wölk, M. Dreyer, and H. J. Rath, *University of Bremen, Germany*; and M. M. Weislogel, *NASA Lewis Research Center* (**34**, 1, p. 110) Article

A97-016 Symmetric Motion Control for Adaptive Structure Based Construction of Large Space Structures. Saburo Matunaga, *Tokyo Institute of Technology, Japan*; and Junjiro Onoda, *Institute for Space and Astronautical Science, Japan* (**34**, 1, p. 118) Article

A97-017 Low-Earth-Orbit Micrometeoroid and Debris Investigations. L. Berthoud, *European Space Agency, The Netherlands*; and J. C. Mandeville, *ONERA, France* (**34**, 1, p. 125) Article

A97-018 U-Groove Aluminum Weld Strength Improvement. V. Verderaime and R. Vaughan, *NASA Marshall Space Flight Center* (**34**, 1, p. 133) Article

A97-019 Planning Spiral Motions of Nonholonomic Free-Flying Space Robots. Y. Nakamura and T. Suzuki, *University of Tokyo, Japan* (**34**, 1, p. 137) Article

A97-020 Hammerhead Wake Effects on Elastic Vehicle Dynamics. L. E. Ericsson, *Lockheed Missiles and Space Company, Inc.* (**34**, 2, p. 145) Article

A97-021 Numerical Analysis of a Swept-Fin Missile. Kenneth J. Moran and Philip S. Beran, *U.S. Air Force Institute of Technology* (**34**, 2, p. 152) Article

A97-022 Mission Performance and Design Sensitivities of Air-Breathing Hypersonic Launch Vehicles. David K. Schmidt and T. Alan Lovell, *University of Maryland* (**34**, 2, p. 158) Article

A97-023 Periodic Optimal Cruise for a Hypersonic Vehicle with Constraints. C.-H. Chuang and Hitoshi Morimoto, *Georgia Institute of Technology* (**34**, 2, p. 165) Article

A97-024 Trajectory-Based Validation of the Shuttle Heating Environment. Dave Olynick and Tim Tam, *NASA Ames Research Center* (**34**, 2, p. 172) Article

A97-025 Aerodynamic Forces and Moments for a Re-Entry Module. J. Allègre, M. Raffin, and J. C. Lengrand, *Centre National de la Recherche Scientifique, France*; and A. Chpoun, *Université d'Evry, France* (**34**, 2, p. 182) Article

A97-026 Preliminary Design of a Hybrid Propulsion Multimission Missile System. J. D. Sims and R. A. Frederick Jr., *University of Alabama in Huntsville* (**34**, 2, p. 186) Article

A97-027 Fundamentals and Issues in Launch Vehicle Design. Robert S. Ryan and John S. Townsend, *NASA Marshall Space Flight Center* (**34**, 2, p. 192) Article based on AIAA Paper 96-1194 CP964

A97-028 Experimental Investigation of Spacecraft In-Flight Disturbances and Dynamic Response. Stanley E. Woodard, *NASA Langley Research Center*; Richard R. Lay and Robert F. Jarnot, *Jet Propulsion Laboratory, Calfornia Institute of Technology*; and David A. Gell, *University of Michigan* (**34**, 2, p. 199) Article

A97-029 Turbulent Flow Structure Characterization of Angled Injection into a Supersonic Crossflow. Rodney D. W. Bowersox, *U.S. Air Force Institute of Technology* (**34**, 2, p. 205) Article

A97-030 Mixture-Ratio Control to Improve Hydrogen-Fuel

Rocket Performance. Guido Colasurdo, Dario Pastrone, and Lorenzo Casalino, *Politecnico di Torino, Italy* (**34**, 2, p. 214) Article

Technical Comment by Michael J. Dunn, *The Boeing Company* (**34**, 5, p. 691)

A97-031 Contamination Experiments in the Midcourse Space Experiment. O. Manuel Uy, R. C. Benson, R. E. Erlandson, M. T. Boies, and J. F. Lesho, *Johns Hopkins University, Applied Physics Laboratory*; G. E. Galica and B. D. Green, *Physical Sciences, Inc.*; B. E. Wood, *Arnold Engineering Development Center*; and D. F. Hall, *The Aerospace Corporation* (**34**, 2, p. 218) Article based on AIAA Paper 96-0219

A97-032 Spacecraft Orbits Around Asteroids for Global Mapping. Masayoshi Utashima, *National Space Development Agency, Japan* (**34**, 2, p. 226) Article

A97-033 Collision and Debris Hazard Assessment for a Low-Earth-Orbit Space Constellation. V. A. Chobotov, D. E. Herman, and C. G. Johnson, *The Aerospace Corporation* (**34**, 2, p. 233) Article

A97-034 Effects of Severed Tethers in Space. F. Angrilli, R. Da Forno, F. Reccanello, and A. Zago, *University of Padua, Italy*; and G. Fanti, *University of Parma, Italy* (**34**, 2, p. 239) Article

A97-035 Methodology for Cost–Benefit Analysis of Space Launch Infrastructure. Douglas A. Comstock, Carissa Bryce Christensen, Gregg Maryniak, and Hans ten Cate, *Futron Corporation* (**34**, 2, p. 246) Article

A97-036 Astronaut-Induced Disturbances in Microgravity. Dava J. Newman, Michail Tryfonidis, and Marthinus C. van Schoor, *Massachusetts Institute of Technology* (**34**, 2, p. 252) Engineering Note

A97-037 Simulation of an Aerospace Vehicle Pitch-Over Maneuver. William L. Kleb, *NASA Langley Research Center* (**34**, 2, p. 254) Engineering Note based on AIAA Paper 96-0825

A97-038 Effect of Riblets on Axisymmetric Base Pressure. V. Krishnan, P. R. Viswanath, and S. Rudrakumar, *National Aerospace Laboratories, India* (**34**, 2, p. 256) Engineering Note

A97-039 Design of Hypersonic Waveriders with Wing–Body–Tail–Inlet Engine. Sheam-Chyun Lin, Yung-Wha Liu, and Ming-Chiou Shen, *National Taiwan Institute of Technology, Taiwan, ROC* (**34**, 2, p. 258) Engineering Note

A97-040 Aerodynamic Considerations for Kinetic Energy Projectiles. Edward M. Schmidt, *U.S. Army Research Laboratory* (**34**, 2, p. 261) Engineering Note

A97-041 Wind-Tunnel Test of Flow Through Mars Pathfinder Lander. Thomas Rivell, Alvin Seiff, Srba Jovic, Gregory R. Wilson, Scott Maa, and Timothy P. Castellano, *NASA Ames Research Center* (**34**, 3, p. 265) Article

A97-042 Comparison Between Numerical and Experimental Results on Different Hermes Elevon Shapes. F. De Filippis, M. Serpico, and M. Marini, *Centro Italiano Ricerche Aerospaziali*; and J. P. Tribot and M. Ravachol, *Dassault Aviation, France* (**34**, 3, p. 272) Article based on AIAA Paper 96-2472 CP965

A97-043 Pressure Distribution on Sabots in Hypervelocity Flight. Martin J. Guillot, Jason N. Dick, and William G. Reinecke, *University of Texas at Austin* (**34**, 3, p. 279) Article

A97-044 Film Cooling Effect of Hydrogen on Cylinder in Supersonic Airflow. Kenichi Takita, *Tohoku University, Japan* (**34**, 3, p. 285) Article

A97-045 Zero-Lift Drag Characteristics of Afterbodies with a Square Base. P. R. Viswanath and S. R. Patil, *National Aerospace Laboratories, India* (**34**, 3, p. 290) Article

A97-046 Structure of a Supersonic Three-Dimensional Cylinder/Offset-Flare Turbulent Interaction. Datta Gaitonde and J. S. Shang, *U.S. Air Force Wright Laboratory*; and J. R. Edwards, *North Carolina State University* (**34**, 3, p. 294) Article

A97-047 Solid Rocket Motor Exhaust Model for Alumina Particles in the Stratosphere. Edward J. Beiting, *The Aerospace Corporation* (**34**, 3, p. 303) Article based on AIAA Paper 97-0532

A97-048 Predicted Optical Characteristics of Solid Rocket Motor Exhaust in the Stratosphere. Edward J. Beiting, *The Aerospace Corporation* (**34**, 3, p. 311) Article

A97-049 Cracking Characteristics of Dual-Wall Structures Following Simulated Orbital Debris Particle Impact. William P. Schonberg, *University of Alabama in Huntsville*; and Joel E. Williamsen, *NASA Marshall Space Flight Center* (**34**, 3, p. 318) Article

A97-050 Internal Effects Model for Spacecraft Modules Perforated by Orbital Debris. William P. Schonberg and John Serrano, *University of Alabama in Huntsville*; and Joel E. Williamsen, *NASA Marshall Space Flight Center* (**34**, 3, p. 325) Article

A97-051 Six-Degree-of-Freedom Entry Dispersion Analysis for the METEOR Recovery Module. Prasun N. Desai, Robert D. Braun, Richard W. Powell, Walter C. Engelund, and Paul V. Tartabini, *NASA Langley Research Center* (**34**, 3, p. 334) Article based on AIAA Paper 96-0903

A97-052 Six-Degree-of-Freedom Trajectory Targeting and Optimization for Titan Launch Vehicles. Prabhakara P. Rao, Brian M. Sutter, and Philip E. Hong, *Lockheed Martin Astronautics* (**34**, 3, p. 341) Article based on AIAA Paper 96-3776

A97-053 Trajectory Options to Pluto via Gravity Assists from Venus, Mars, and Jupiter. Jon Andrew Sims, Andrew James Staugler, and James Michael Longuski, *Purdue University* (**34**, 3, p. 347) Article

A97-054 Dynamic Model for Global Positioning System Block IIR Space Vehicle. C. S. Lin and T. R. Cole, *The Aerospace Corporation* (**34**, 3, p. 354) Article

A97-055 Moon–Sun Attitude Sensor. Daniele Mortari, *University of Rome "La Sapienza," Italy* (**34**, 3, p. 360) Article based on AIAA Paper 96-3618 CP969

A97-056 Heliospheric Boundary Exploration Using Ion Propulsion Spacecraft. Craig A. Kluever, *University of Missouri–Columbia/Kansas City* (**34**, 3, p. 365) Article

A97-057 Unsteady Flowfield and Cavity Acoustics of the Stratospheric Observatory for Infrared Astronomy. G. R. Srinivasan, *NASA Ames Research Center* (**34**, 3, p. 372) Article based on AIAA Paper 95-1862 CP955

A97-058 Nocilla Model Parameters Obtained from Forces Exerted on Surfaces by Molecular Beams. Steven R. Cook and Mark A. Hoffbauer, *Los Alamos National Laboratory* (**34**, 3, p. 379) Article

A97-059 Thermal Sensitivity Analysis of Spacecraft Battery. S. Suresha, *Indian Space Research Organisation Satellite Centre*; S. C. Gupta, *Indian Institute of Science*; and R. A. Katti, *Indian Space Research Organisation Satellite Centre* (**34**, 3, p. 384) Article

A97-060 Functional Performance of Pyrovalves. Laurence J. Bement, *NASA Langley Research Center* (**34**, 3, p. 391) Article based on AIAA Paper 96-2754

A97-061 Numerical Correlations Between Flight and Plasma Wind-Tunnel Tests. Salvatore Borrelli and Antonio Schettino, *Centro Italiano Ricerche Aerospaziali* (**34**, 3, p. 397) Engineering Note

A97-062 Optimal Properties of Bodies of Revolution in Continuum and Free Molecular Regimes. A. Dubinsky and T. Elperin, *Ben-Gurion University of the Negev, Israel* (**34**, 3, p. 400) Engineering Note

A97-063 Extreme Value Flight Duration Analysis of Four-Engine Spacecraft. Hüseyin Sarper, *University of Southern Colorado* (**34**, 3, p. 402) Engineering Note

A97-064 Maximum-Payload Transfers to Geosynchronous Orbit Using Arcjet Thrusters. Craig A. Kluever, *University of Missouri–Columbia/Kansas City* (**34**, 3, p. 405) Engineering Note

A97-065 Three-Dimensional Hypersonic Laminar Boundary-Layer Computations for Transition Experiment Design. Roger L. Kimmel and Mark A. Klein, *U.S. Air Force Wright Laboratory*; and Stephen N. Schwoerke, *Lockheed Martin Corporation* (**34**, 4, p. 409) Article based on AIAA Paper 96-2080

A97-066 Fin Leading-Edge Sweep Effect on Shock–Shock Interaction at Mach 6. Scott A. Berry and Robert J. Nowak, *NASA Langley Research Center* (**34**, 4, p. 416) Article based on AIAA Paper 96-0230

A97-067 Effect of Isolated Roughness Elements on Boundary-Layer Transition for Shuttle Orbiter. John J. Bertin, *U.S. Air Force Academy*; Kenneth F. Stetson; Stanley A. Bouslog, *Rohr Industries, Inc.*; and Jose M. Caram, *NASA Johnson Space Center* (**34**, 4, p. 426) Article

A97-068 Fluid Dynamics of Hypersonic Forward-Facing Cavity Flow. W. A. Engblom and D. B. Goldstein, *University of Texas at Austin*; and D. Ladoon and S. P. Schneider, *Purdue University* (**34**, 4, p. 437) Article

A97-069 Experimental Study of Cone-Derived Waveriders at Mach 5.5. T. Ohta, T. Miyagawa, and R. Matsuzaki, *Tokyo Metropolitan Institute of Technology, Japan* (**34**, 4, p. 445) Article

A97-070 High-Enthalpy Aerothermodynamics of a Mars Entry Vehicle Part 1: Experimental Results. Brian R. Hollis and John N. Perkins, *North Carolina State University* (**34**, 4, p. 449) Article

A97-071 High-Enthalpy Aerothermodynamics of a Mars Entry Vehicle Part 2: Computational Results. Brian R. Hollis and John N. Perkins, *North Carolina State University* (**34**, 4, p. 457) Article

A97-072 Aerodynamic Characteristics Evaluation of Hypersonic Flight Experiment Vehicle Based on Flight Data. Shigeya Watanabe, Shinji Ishimoto, and Yukimitsu Yamamoto, *National Aerospace Laboratory, Japan* (**34**, 4, p. 464) Article based on AIAA Paper 96-4527

A97-073 Navier–Stokes Computations of Finned Kinetic Energy Projectile Base Flow. Bernard J. Guidos, *U.S. Army Research Laboratory* (**34**, 4, p. 471) Article based on AIAA Paper 95-3460 CP958

A97-074 Collaborative Approach to Launch Vehicle Design. R. D. Braun and A. A. Moore, *NASA Langley Research Center*; and I. M. Kroo, *Stanford University* (**34**, 4, p. 478) Article based on AIAA Paper 96-4018 CP9611

A97-075 Flight Control Augmentors for Aft-Center-of-Gravity Launch Vehicles. Chris Barret, *NASA Marshall Space Flight Center* (**34**, 4, p. 487) Article

A97-076 Improved Matched Asymptotic Solutions for Three-Dimensional Atmospheric Skip Trajectories. Zeal-Sain Kuo, *Chung Cheng Institute of Technology, Taiwan, ROC*; and Nguyen X. Vinh, *University of Michigan* (**34**, 4, p. 496) Article based on AIAA Paper 96-3596 CP969

A97-077 Navigating Galileo at Jupiter Arrival. R. J. Haw, P. G. Antreasian, T. P. McElrath, E. J. Graat, and F. T. Nicholson, *Jet Propulsion Laboratory, California Institute of Technology* (**34**, 4, p. 503) Article

A97-078 Cassini/Huygens Science Instruments, Spacecraft, and Mission. Leonard D. Jaffe and Linda M. Herrell, *Jet Propulsion Laboratory, California Institute of Technology* (**34**, 4, p. 509) Article

A97-079 Air-Quality Monitoring and Detection of Air Contamination in an Enclosed Environment. Mikhail Skliar, *University of Utah*; and W. Fred Ramirez, *University of Colorado* (**34**, 4, p. 522) Article

A97-080 Preflight Testing and Flight Performance of the OEDIPUS-C Tether Force Sensor. Alexander M. Jablonski and Frank R. Vigneron, *Canadian Space Agency*; Ray D. Rhew, *NASA Langley Research Center*; John L. Bergmans, *CFD Research Corporation*; and William R. Whitehead and George Tyc, *Bristol Aerospace Limited, Canada* (**34**, 4, p. 533) Article

A97-081 Influence of X-Ray Solar Flare Radiation on Degradation of Teflon® in Space. Andrei Milintchouk, Marc Van Eesbeek, François Levadou, and Tim Harper, *European Space Agency, The Netherlands* (**34**, 4, p. 542) Article

A97-082 Efficient Calculation of a Jitter/Stability Metric. Daniel P. Giesy, *Lockheed Martin Corporation* (**34**, 4, p. 549) Article

A97-083 Method of Basic Projectiles for Calculating Force Coefficients. A. Dubinsky and T. Elperin, *Ben-Gurion University of the Negev, Israel* (**34**, 4, p. 558) Engineering Note

A97-084 Transonic Flow Simulation for a Bulbous Heat Shield. R. C. Mehta, *Vikram Sarabhai Space Center, India* (**34**, 4, p. 561) Engineering Note

A97-085 Lunar Landing Craft for the Reusable Launch Vehicle and Shuttle Vehicles. Benjamin B. Donahue, *Boeing Defense and Space Group* (**34**, 4, p. 564) Engineering Note based on AIAA Paper 96-4459

A97-086 Calculation of Pitch Damping for a Flared Projectile. N. Qin, D. K. Ludlow, and S. T. Shaw, *Cranfield College of Aeronautics, England, UK*; J. A. Edwards, *Defence Research and Evaluation Agency, England, UK*; and A. Dupuis, *Defence Research Establishment, Valcartier, Canada* (**34**, 4, p. 566) Engineering Note based on AIAA Paper 97-0405

A97-087 Individual Components of the Yaw Damping Sum: Implementation for Tumbling Bodies. S. Ellis, L. W. Longdon, and G. M. Moss, *Cranfield University, England, UK* (**34**, 4, p. 568) Engineering Note

A97-088 Evolution of Secondary Electron Emission Characteristics of Spacecraft Surfaces. R. E. Davies and J. R. Dennison, *Utah State University* (**34**, 4, p. 571) Engineering Note

A97-089 Optimization of a Dual-Mixture-Ratio Hydrogen-Fuel Rocket. Lorenzo Casalino, *Politecnico di Torino, Italy* (**34**, 4, p. 574) Engineering Note

A97-090 High-Fidelity Thermal Protection System Sizing of Reusable Launch Vehicle. G. E. Palmer, W. D. Henline, D. R. Olynick, and F. S. Milos, *NASA Ames Research Center* (**34**, 5, p. 577) Article based on AIAA Paper 95-2080

A97-091 Computational Analysis and Validation for Lateral Jet Controlled Missiles. B. Srivastava, *Raytheon Company* (**34**, 5, p. 584) Article

A97-092 Flow Confluence Past a Jet-On Axisymmetric Afterbody. Philippe Reijasse, Bernard Corbel, and Jean Délery, *ONERA, France* (**34**, 5, p. 593) Article based on AIAA Paper 96-2449 CP965

A97-093 Plasma and Aerothermal Measurements on a Hypervelocity Re-Entry Vehicle. Kenneth M. Chadwick, *Calspan SRL Corporation* (**34**, 5, p. 602) Article based on AIAA Paper 96-2322

A97-094 Development of a Flight Article for a Hypersonic Boundary-Layer Experiment. W. Lance Richards and Richard C. Monaghan, *NASA Dryden Flight Research Center* (**34**, 5, p. 609) Article

A97-095 Enthalpy Effects on Hypervelocity Boundary-Layer Transition: Ground Test and Flight Data. Philippe H. Adam and Hans G. Hornung, *California Institute of Technology* (**34**, 5, p. 614) Article

A97-096 Analysis of Flowfields over Four-Engine DC-X Rockets. Ten-See Wang and Joni Cornelison, *NASA Marshall Space Flight Center* (**34**, 5, p. 620) Article based on AIAA Paper 96-2953

A97-097 Conceptual Study of a Two-Stage, Air-Breathing Reusable Launch Vehicle. Shinei Takahashi, Kazuhide Mizobata, and Keisuke Sawada, *Tohoku University, Japan* (**34**, 5, p. 628) Article based on AIAA Paper 97-0192

A97-098 Tripropellant Engine Option Comparison for Single Stage to Orbit. B. David Goracke and Daniel J. H. Levack, *The Boeing Company*; and Gary W. Johnson, *NASA Marshall Space Flight Center* (**34**, 5, p. 636) Article based on AIAA Paper 95-3609

A97-099 Validation Database for Propulsion Computational Fluid Dynamics. Houshang B. Ebrahimi, *Sverdrup Technology, Inc.* (**34**, 5, p. 642) Article

A97-100 Computational Comparison of Debris Cloud Models. S. P. Barrows, *Smith System Engineering, Ltd., England, UK*; G. G. Swinerd, *University of Southampton, England, UK*; and R. Crowther, *Defence Evaluation and Research Agency, England, UK* (**34**, 5, p. 650) Article

A97-101 Transient Potential Modification of Large Spacecraft Due to Electron Emissions. Sven G. Bilén, Victor M. Agüero, and Brian E. Gilchrist, *University of Michigan*; and W. John Raitt, *Utah State University* (**34**, 5, p. 655) Article

A97-102 Damped Gyroscopic Modes of Spinning Tethered Space Vehicles with Flexible Booms. F. R. Vigneron and A. M. Jablonski, *Canadian Space Agency*; R. Chandrashaker, *Pratt and Whitney Canada*; and G. Tyc, *Bristol Aerospace, Ltd., Canada* (**34**, 5, p. 662) Article

A97-103 Some Correlation Techniques for Environmentally Induced Anomalies Analysis. F. J. López Honrubia and A. Hilgers, *European Space Agency, The Netherlands* (**34**, 5, p. 670) Article

A97-104 Systems Engineering Trades for the IRIDIUM® Constellation. T. P. Garrison, M. Ince, J. Pizzicaroli, and P. A. Swan, *Motorola Satellite Communications Group* (**34**, 5, p. 675) Article

A97-105 Analytical Formulation for Thermal Protection of Active Cooling Nosetips. F. Ren and J. R. Tang, *Chinese Academy of Sciences, PRC*; and L. Y. Liu, Z. Z. Wu, and H. S. Sun, *China Academy of Launch Vehicle Technology, PRC* (**34**, 5, p. 681) Engineering Note

A97-106 Performance of Diamond-Coated Silicon Nitride Bearings. M. D. Drory, *Crystallume* (**34**, 5, p. 683) Engineering Note

A97-107 Payload Capability of Kerosene-Fueled Mini Shuttle. Frederick W. Boltz, *NASA Ames Research Center* (**34**, 5, p. 685) Engineering Note

A97-108 Aerodynamic Flight Measurements and Rarefied-Flow Simulations of Mars Entry Vehicles. Robert C. Blanchard, Richard G. Wilmoth, and James N. Moss, *NASA Langley Research Center* (**34**, 5, p. 687) Engineering Note

A97-109 Hypersonic Thermal Environment of a Proposed Single-Stage-to-Stage-Orbit Vehicle. K. James Weilmuenster, P. A. Gnoffo, F. A. Greene, C. J. Riley, and H. H. Hamilton II, *NASA Langley Research Center* (**34**, 6, p. 697) Article

A97-110 Galileo Probe Heat Shield Ablation Experiment. Frank S. Milos, *NASA Ames Research Center* (**34** , 6, p. 705) Article

A97-111 Experimental Rarefied Density Flowfields at Hypersonic Conditions over 70-Degree Blunted Cone. J. Allègre, D. Bisch, and J. C. Lengrand, *Centre National de la Recherche Scientifique, France* (**34**, 6, p. 714) Article

A97-112 Experimental Rarefied Aerodynamic Forces at Hypersonic Conditions over 70-Degree Blunted Cone. J. Allègre, D. Bisch, and J. C. Lengrand, *Centre National de la Recherche Scientifique, France* (**34**, 6, p. 719) Article

A97-113 Experimental Rarefied Heat Transfer at Hypersonic Conditions over 70-Degree Blunted Cone. J. Allègre, D. Bisch, and J. C. Lengrand, *Centre National de la Recherche Scientifique, France* (**34**, 6, p. 724) Article

A97-114 Experimental Investigation of the Flow Structure Near a Single Wraparound Fin. C. P. Tilmann and R. E. Huffman Jr., *U.S. Air Force Wright Laboratory*; T. A. Buter, *U.S. Air Force Institute of Technology*; and R. D. W. Bowersox, *University of Alabama* (**34**, 6, p. 729) Article

A97-115 Base Cavity Effects on the Aerodynamic Characteristics of a Hypersonic Flared Projectile. E. Y. Fournier and A. D. Dupuis, *Defence Research Establishment, Valcartier, Canada*; and J. A. Edwards, *Defence Research Agency, England, UK* (**34**, 6, p. 737) Article

A97-116 Methods for Distributing Semiempirical, Nonlinear, Aerodynamic Loads on Missile Components. F. G. Moore and R. M. McInville, *U.S. Naval Surface Warfare Center*; and Clint Housh, *U.S. Naval Air Warfare Center* (**34**, 6, p. 744) Article

A97-117 Navier–Stokes Predictions of Pitch Damping for Axisymmetric Projectiles. Paul Weinacht and Walter B. Sturek, *U.S. Army Research Laboratory*; and Lewis B. Schiff, *NASA Ames Research Center* (**34**, 6, p. 753) Article

A97-118 Control Effectiveness of a Jet–Slender Body Combination at Hypersonic Speeds. K. Kontis and J. L. Stollery, *Cranfield University, England, UK* (**34**, 6, p. 762) Article based on AIAA Paper 96-2470 CP965

A97-119 Extracting Meteorological Data from Projectile Trajectory. Gene R. Cooper, Kevin S. Fansler, and Vural Oskay, *U.S. Army Research Laboratory* (**34**, 6, p. 769) Article based on AIAA Paper 95-3437 CP958

A97-120 Effects of Launch Vehicle Emissions in the Stratosphere. B. B. Brady, L. R. Martin, and V. I. Lang, *The Aerospace Corporation* (**34**, 6, p. 774) Article

A97-121 Modeling the Multiphase Atmospheric Chemistry of Launch Clouds. B. B. Brady and L. R. Martin, *The Aerospace Corporation* (**34**, 6, p. 780) Article

A97-122 Life Extension Strategies for Shuttle-Deployed Small Satellites Using Pulsed Plasma Thrusters. Dennis L. Tilley and Ronald A. Spores, *U.S. Air Force Phillips Laboratory* (**34**, 6, p. 785) Article based on AIAA Paper 96-2730

A97-123 Steady-State and Frequency Response of a Thin-Film Heat Flux Gauge. Christopher S. Cho, *Western Michigan University*; and Gustave C. Fralick and Hemanshu D. Bhatt, *NASA Lewis Research Center* (**34**, 6, p. 792) Article

A97-124 Position of Propellant in Teardrop Tank Systems. Masahiko Utsumi, *Ishikawajima–Harima Heavy Industries Company, Ltd., Japan* (**34**, 6, p. 799) Article

A97-125 Spacecraft Launch Depressurization Loads. Ángel Sanz-Andrés, Julián Santiago-Prowald, and Antonio Ayuso-Barea, *Universidad Politécnica de Madrid, Spain* (**34**, 6, p. 805) Article

A97-126 Deployment Test Methods for a Large Deployable Mesh Reflector. Hiroaki Tsunoda, Ken-ichi Hariu, and Yoichi Kawakami, *Advanced Space Communications Research Laboratory, Japan*; and Kazuo Miyoshi, Jun Nakagawa, and Toshio Sugimoto, *Mitsubishi Electric Corporation, Japan* (**34**, 6, p. 811) Article based on AIAA Paper 97-1148 CP973

A97-127 Neutral Orbital Altitude Density Effects on the International Space Station. O. E. Smith, S. I. Adelfang, and R. E. Smith, *Computer Sciences Corporation* (**34**, 6, p. 817) Article

A97-128 Model of Plasma Contactor Performance. I. Katz, B. M. Gardner, M. J. Mandell, and G. A. Jongeward, *Maxwell Technologies*; M. Patterson, *NASA Lewis Research Center*; and R. M. Myers, *Olin Aerospace Company* (**34**, 6, p. 824) Article

A97-129 Virtual Anode in Ion Beam Emissions in Space: Numerical Simulations. Joseph Wang, *Jet Propulsion Laboratory, California Institute of Technology*; and Shu T. Lai, *U.S. Air Force Phillips Laboratory* (**34**, 6, p. 829) Article

A97-130 Cost per Billable Minute Metric for Comparing Satellite Systems. Cary C. Gumbert, Michael D. Violet, Daniel E. Hastings, Walter M. Hollister, and Robert R. Lovell, *Massachusetts Institute of Technology* (**34**, 6, p. 837) Article

A97-131 International Space Station Electromagnetic Environment. Shian U. Hwu, *Lockheed Martin Space Mission Systems and Services*; and Robert J. Panneton, *NASA Johnson Space Center* (**34**, 6, p. 847) Engineering Note

A97-132 Efficient Approach for International Space Station Global Positioning System Multipath Analysis. Shian U. Hwu, *Lockheed Martin Space Mission Systems and Services*; and Robert J. Panneton and Susan F. Gomez, *NASA Johnson Space Center* (**34**, 6, p. 848) Engineering Note
